Awakening Sharon Bolton, 2013-02-05 An epidemic of venomous snakes in an English village drives an insecure veterinarian to unravel a bizarre mystery in this gothic suspense thriller. Clara Benning, a veterinary surgeon in charge of a wildlife hospital in a small English village, is young and intelligent, but reclusive. Disfigured by a childhood accident, she prefers animals to people. When a local man dies following a supposed snakebite, Clara's expertise is needed. She's chilled to learn that the victim's postmortem shows a higher concentration of venom than could ever be found in a single snake—and therefore, the killer must be human. Assisted by a soft-spoken neighbor and an eccentric reptile expert, Clara uncovers links to an ancient ritual, an abandoned house, and a fifty-year-old tragedy. But for someone the truth must remain buried in the past—even if they have to kill to keep it there . . . Awakening is a disturbing tale of dark secrets that will have readers unable to stop for a breath until they reach the stunning climax of this extraordinary read. A Booklist Top Ten Crime Novel of the Year

Little Black Lies Sharon Bolton, 2015-05-19 In such a small community as the Falkland Islands, a missing child is unheard of. In such a dangerous landscape it can only be a terrible tragedy, surely... When another child goes missing, and then a third, it's no longer possible to believe that their deaths were accidental, and the villagers must admit that there is a murderer among them. Even Catrin Quinn, a damaged woman living a reclusive life after the accidental deaths of her own two sons a few years ago, gets involved in the searches and the speculation. And suddenly, in this wild and beautiful place that generations have called home, no one feels safe and the hysteria begins to rise. But three islanders—Catrin, her childhood best friend, Rachel, and her ex-lover Callum—are hiding terrible secrets. And they have two things in common: all three of them are grieving, and none of them trust anyone, not even themselves. In Little Black Lies, her most shocking and engaging suspense novel to date, Sharon Bolton will keep the reader guessing until the very last page.

The Spectral Arctic Shane McCorristine,2018-05-01 Visitors to the Arctic enter places that have been traditionally

imagined as otherworldly. This strangeness fascinated audiences in nineteenth-century Britain when the idea of the heroic explorer voyaging through unmapped zones reached its zenith. The Spectral Arctic re-thinks our understanding of Arctic exploration by paying attention to the importance of dreams and ghosts in the quest for the Northwest Passage. The narratives of Arctic exploration that we are all familiar with today are just the tip of the iceberg: they disguise a great mass of mysterious and dimly lit stories beneath the surface. In contrast to oft-told tales of heroism and disaster, this book reveals the hidden stories of dreaming and haunted explorers, of frozen mummies, of rescue balloons, visits to Inuit shamans, and of the entranced female clairvoyants who travelled to the Arctic in search of John Franklin's lost expedition. Through new readings of archival documents, exploration narratives, and fictional texts, these spectral stories reflect the complex ways that men and women actually thought about the far North in the past. This revisionist historical account allows us to make sense of current cultural and political concerns in the Canadian Arctic about the location of Franklin's ships.

Climate Change and Indigenous Peoples in the United States Julie Koppel Maldonado, Benedict Colombi, Rajul Pandya, 2014-04-05 With a long history and deep connection to the Earth's resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in Climatic Change, Volume 120, Issue 3, 2013.
