**Chemical Engineering III** Jiatao Zhang,2013-11-29 Chemical Engineering III includes the proceedings of the 3rd SREE Conference on Chemical Engineering (CCE 2013, Hong Kong, 28-29 December 2013) and the 2nd SREE Workshop on Energy, Environment and Engineering (WEEE 2013, which was a part of CCE 2013). The contributions discuss current practical challenges and solutions in Chemical Engineering, and

*Doctoral Education in South Africa* Nico Cloete,Johann Mouton,2015-12-08 Worldwide, in Africa and in South Africa, the importance of the doctorate has increased disproportionately in relation to its share of the overall graduate output over the past decade. This heightened attention has not only been concerned with the traditional role of the PhD, namely the provision of future academics; rather, it has focused on the increasingly important role that higher education and, particularly, high-level skills is perceived to play in national development and the knowledge economy. This book is unique in the area of research into doctoral studies because it draws on a large number of studies conducted by the Centre of Higher Education Trust (CHET) and the Centre for Research on Evaluation, Science and Technology (CREST), as well as on studies from the rest of Africa and the world. In addition to the historical studies, new quantitative and qualitative research was undertaken to produce the evidence base for the analyses presented in the book. The findings presented in *Doctoral Education in South Africa* pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

**Elusive Equity** Edward B. Fiske,Helen F. Ladd,2004 *Elusive Equity* chronicles South Africa's efforts to fashion a racially equitable state education system from the ashes of apartheid. Edward Fiske and Helen Ladd draw on previously unpublished data, interviews with key officials, and visits to dozens of schools to describe the changes made in school finance, teacher assignment policies, governance, curriculum, higher education, and other areas.

**Curriculum Studies in South Africa** W. Pinar,2010-02-15 While much has been written about South African education, now, for the first time, gathered in one collection are glimpses of South African curriculum studies described by six

distinctive points of view.

**Dynamics of Contention** Doug McAdam,Sidney Tarrow,Charles Tilly,2001-09-10 In recent decades the study of social movements, revolution, democratization and other non-routine politics has flourished. And yet research on the topic remains highly fragmented, reflecting the influence of at least three traditional divisions. The first of these reflects the view that various forms of contention are distinct and should be studied independent of others. Separate literatures have developed around the study of social movements, revolutions and industrial conflict. A second approach to the study of political contention denies the possibility of general theory in deference to a grounding in the temporal and spatial particulars of any given episode of contention. The study of contentious politics are left to 'area specialists' and/or historians with a thorough knowledge of the time and place in question. Finally, overlaid on these two divisions are stylized theoretical traditions - structuralist, culturalist, and rationalist - that have developed largely in isolation from one another. This book was first published in 2001.

*Ways of Learning* Alan Pritchard,2013-12-04 Whilst most teachers are skilled in providing opportunities for the progression of children's learning, it is often without fully understanding the theory behind it. With greater insight into what is currently known about the processes of learning and about individual learning preferences, teachers are better equipped to provide effective experiences and situations which are more likely to lead to lasting attainment. Now fully updated, *Ways of Learning* seeks to provide an understanding of the ways in which learning takes place, which teachers can make use of in their planning and teaching, including: An overview of learning Behaviourism and the beginning of theory Cognitive and constructivist learning Multiple intelligences Learning styles Difficulties with learning The influence of neuro-psychology Relating theory to practice The third edition of this book includes developments in areas covered in the first and second editions, as well as expanding on certain topics to bring about a wider perspective; most noticeably a newly updated and fully expanded chapter on the influence of neuro-educational research. The book also reflects changes in government policy and is closely related to new developments in practice. Written for trainee teachers, serving teachers, and others interested in learning for various reasons, *Ways of Learning* serves as a valuable introduction for students setting out on higher degree work who are in need of an introduction to the topic.

**Becoming a teacher** Josef de Beer,2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum

(or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

**Knowledge Production and Contradictory Functions in African Higher Education** Nico Cloete, Peter Maassen, 2015-03-01 The dominant global discourse in higher education now focuses on world-class universities inevitably located predominantly in North America, Europe and, increasingly, East Asia. The rest of the world, including Africa, is left to play catch-up. But that discourse should focus rather on the tensions, even contradictions, between excellence and engagement with which all universities must grapple. Here the African experience has much to offer the high-participation and generously resourced systems of the so-called developed world. This book offers a critical review of that experience, and so makes a major contribution to our understanding of higher education.

**Student Retention & Graduate Destination** Moeketsi Letseka, 2010 Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a

successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

**Reading in the Composition Classroom** Joan Carson, Ilona Leki, 1993

**Higher Education Institutions in African [sic] Responding to HIV/AIDS.** ,2006

**Good Research Guide** Martyn Denscombe, 2003 The Good Research Guide has been a bestselling introduction to the basics of social research since it was first published in 1998. This new second edition of the book offers the same clear guidance on how to conduct successful small-scale research projects and adds even more value by including new sections on internet research, phenomenology, grounded theory and image-based methods. The book provides: a clear summary of the relevant strategies, methods and approaches to data analysis a jargon-free coverage of the key issues an attractive layout and user-friendly presentation checklists to guide good practice. Practical and comprehensive, The Good Research Guide is an invaluable tool for students of education, health studies, business studies and other social sciences, who need to conduct small-scale research projects as part of undergraduate, postgraduate or professional studies.
