Phase Space Stephen Baxter, 2012-06-28 2025. Tied in to Baxter's masterful Manifold trilogy, these thematically linked stories are drawn from the vast graph of possibilities across which the lives of hero Reid Malenfant have been scattered.

Manifold Stephen Baxter, 2001 In Manifold: Time, space explorer Reid Malenfant journeyed to the edge of time. Now, in this second installment to the Manifold series we find him embarking on a grand tour of the universe, while the fate of earth itself appears threatened by the two-pronged menace of an emerging alien presence and out-of-control environmental degradation. Following Malenfant's journey of millions of light years, we find him once more faced with a choice both impossible and necessary -- a choice that will push him beyond terror, beyond sanity, beyond humanity itself.

Space Stephen Baxter, 2001

Manifold: Time Stephen Baxter, 2003-12-16 "Reading Manifold: Time is like sending your mind to the gym for a brisk workout. If you don't feel both exhausted and exhilarated when you're done, you haven't been working hard enough."—The New York Times Book Review The year is 2010. More than a century of ecological damage, industrial and technological expansion, and unchecked population growth has left the Earth on the brink of devastation. As the world's governments turn inward, one man dares to envision a bolder, brighter future. That man, Reid Malenfant, has a very different solution to the problems plaguing the planet: the exploration and colonization of space. Now Malenfant gambles the very existence of time on a single desperate throw of the dice. Battling national sabotage and international outcry, as apocalyptic riots sweep the globe, he builds a spacecraft and launches it into deep space. The odds are a trillion to one against him. Or are they? "A staggering novel! If you ever thought you understood time, you'll be quickly disillusioned when you read Manifold: Time."—Sir Arthur C. Clarke

Evolution Stephen Baxter, 2003-01-01 "Magisterial and uplifting . . . A brilliant, grand-scale sampling of sixty-five million years of human evolution . . . It shows the sweep and grandeur of life in its unrelenting course." —The Denver Post Stretching from the distant past into the remote future, from primordial Earth to the stars, Evolution is a soaring symphony of struggle, extinction, and survival; a dazzling epic that combines a dozen scientific disciplines and a cast of unforgettable characters to convey the grand drama of evolution in all its awesome majesty and rigorous beauty. Sixty-five million years ago, when dinosaurs ruled the Earth, there lived a small mammal, a proto-primate of the species Purgatorius. From this

humble beginning, Baxter traces the human lineage forward through time. The adventure that unfolds is a gripping odyssey governed by chance and competition, a perilous journey to an uncertain destination along a route beset by sudden and catastrophic upheavals. It is a route that ends, for most species, in stagnation or extinction. Why should humanity escape this fate? Praise for Evolution “Spectacular.”—The New York Times Book Review “Strong imagination, a capacity for awe, and the ability to think rigorously about vast and final things abound in the work of Stephen Baxter. . . . [Evolution] leaves the reader with a haunting portrayal of the distant future.”—Times Literary Supplement “A breath of fresh air . . . The miracle of Evolution is that it makes the triumph of life, which is its story, sound like the real story.”—The Washington Post Book World

Moonseed Stephen Baxter, 2009-10-13 It came here decades ago—and it’s devouring our planet: “Literally earth-shattering action . . . Baxter provides the sense of wonder of classic science fiction.” —Denver Post It starts when Venus explodes into a brilliant cloud of dust and debris, showering Earth with radiation and bizarre particles that wipe out all the crops and half the life in the oceans, and fry the ozone layer. Days later, a few specks of moon rock kicked up from the last Apollo mission fall upon a lava crag in Scotland. That’s all it takes . . . Suddenly, the ground itself begins melting into pools of dust that grow larger every day. For what has demolished Venus, and now threatens Earth itself, is part machine, part life-form: a nano-virus, dubbed Moonseed, that attacks planets. Four scientists are all that stand between Moonseed and Earth’s extinction, four brilliant minds that must race to cut off the virus and save what’s left of Earth—a pulse-stopping battle for discovery that will lead them from Earth’s inner core to a daredevil Moon voyage that could save, or damn, us all. Moonseed is a standout novel from Stephen Baxter, author of The Time Ships and recipient of multiple BSFA, Philip K. Dick, and Sidewise Awards. “Science fiction in which the science is right. A sheer pleasure to read.” —New Scientist “His alien threat is an intriguing and original one.” —Kirkus Reviews “A truly spectacular climax.” —Publishers Weekly

Titan Stephen Baxter, 2013-04-11 Signs of life have been found on Titan, Saturn’s largest moon.

Ark Stephen Baxter, 2010-05-04 It’s the year 2030. The oceans have risen rapidly, and soon the entire planet will be submerged. But the discovery of another life-sustaining planet light years away gives those who remain alive hope. Only a few will be able to make the journey—Holle Groundwater is one of the candidates. If she makes the cut, she will live. If not, she will be left to face a watery death...

Proxima Stephen Baxter, 2014-11-04 “Stephen Baxter has been heralded, with some merit, as Arthur C. Clarke’s literary heir, and Proxima certainly reinforces this accolade in spades.”—Concatenation Mankind’s future in this galaxy could be all but infinite. There are hundreds of billions of red dwarf stars, lasting trillions of years—and their planets can be habitable for humans. Such is the world of Proxima Centauri. And its promise could mean the never-ending existence of humanity. But first it must be colonized, and no one wants to be a settler. There is no glamor that accompanies it, nor is there the ease of becoming a citizen of an already-tamed world. There is only hardship...loneliness...emptiness, even as war brews in the solar

system. But that's where Yuri comes in. Because sometimes exploration isn't voluntary. It must be coerced.

Vacuum Diagrams Stephen Baxter, 1998-12-09 And everywhere the humans went they found life... This dazzling future history, the most ambitious and exciting since Asimov's classic Foundation novels, tells the story of Humankind--all the way to the end of the Universe itself. Here, in luminous and vivid narratives spanning five million years, are the first Poole wormholes spanning the solar system; the conquest of Human planets by Squeem; GUTships that outrace light; the back-time invasion of the Qax; the mystery and legacy of the Xeelee, and their artifacts as large as small galaxies; photino birds and Dark Matter; and the Ring, where Ghost, Human, and Xeelee contemplate the awesome end of Time. Stephen Baxter is the most acclaimed and accomplished of a brilliant new generation of authors who are expanding the vision of science fiction and taking it to a new golden age.

Raft Stephen Baxter, 2013-01-24 Stephen Baxter's highly acclaimed first novel and the beginning of his stunning Xeelee Sequence finally enters the SF Masterwork series! A spaceship from Earth accidentally crossed through a hole in space-time to a universe where the force of gravity is one billion times as strong as the gravity we know. Somehow the crew survived, aided by the fact that they emerged into a cloud of gas surrounding a black hole, which provided a breathable atmosphere. Five hundred years later, their descendants still struggle for existence, divided into two main groups. The Miners live on the Belt, a ramshackle ring of dwellings orbiting the core of a dead star, which they excavate for raw materials. These can be traded for food from the Raft, a structure built from the wreckage of the ship, on which a small group of scientists preserve the ancient knowledge which makes survival possible. Rees is a Miner whose curiosity about his world makes him stow away on a flying tree - just one of the many strange local lifeforms - carrying trade between the Belt and the Raft. And what he finds will change his world...

Ring Stephen Baxter, 1996-04-25 Michael Poole's wormholes constructed in the orbit of Jupiter had opened the galaxy to humankind. Then Poole tried looping a wormhole back on itself, tying a knot in space and ripping a hole in time. It worked. Too well. Poole was never seen again. Then from far in the future, from a time so distant that the stars themselves were dying embers, came an urgent SOS--and a promise. The universe was doomed, but humankind was not. Poole had stumbled upon an immense artifact, light-years across, fabricated from the very string of the cosmos. The universe had a door. And it was open...

Timelike Infinity Stephen Baxter, 2009-09 Timelike Infinity: the strange region at the end of time where the Xeelee, owners of the universe, are waiting! The second novel in Stephen Baxter's Xeelee sequence.

Silverhair Stephen Baxter, 2015-10-15 Stephen Baxter breaks genre boundaries and brings his unique imagination, epic scope and elegant style to an anthropomorphic fantasy. Starting with the story of a young female mammoth and the struggle her herd has to survive into the present day on a remote Siberian Island the MAMMOTH trilogy encompasses thousands of

millions of years, the geological and climatic history of earth and a vision of a startling future. All via an astounding evocation of mammoth. Life, biology, intelligence, culture, myth and legend. It is a triumph of imaginative story telling.

Baxter's Explore the Book J. Sidlow Baxter, 2010-09-21 Explore the Book is not a commentary with verse-by-verse annotations. Neither is it just a series of analyses and outlines. Rather, it is a complete Bible survey course. No one can finish this series of studies and remain unchanged. The reader will receive lifelong benefit and be enriched by these practical and understandable studies. Exposition, commentary, and practical application of the meaning and message of the Bible will be found throughout this giant volume. Bible students without any background in Bible study will find this book of immense help as will those who have spent much time studying the Scriptures, including pastors and teachers. Explore the Book is the result and culmination of a lifetime of dedicated Bible study and exposition on the part of Dr. Baxter. It shows throughout a deep awareness and appreciation of the grand themes of the gospel, as found from the opening book of the Bible through Revelation.

Ultima Stephen Baxter, 2015-08-04 Hailed as “one of the most inventive writers that science fiction has ever produced (SF Site), Stephen Baxter builds on the massive success of Proxima with a career-defining novel of big ideas.... On the planet of Per Ardua, alien artifacts were discovered—hatches that allowed humans to step across light-years of space as if they were stepping into another room. But this newfound freedom has consequences.... As humanity discovers the real nature of the universe, a terrifying truth comes to light. We all have countless pasts converging in this present—and our future is terrifyingly finite. There are minds in the universe that are billions of years old and now we are vulnerable to their plans for us.... It's time to fight back and take control.

Flatlander Larry Niven, 2009-02-25 Gil “The Arm” Hamilton was one of the top operatives of ARM, the elite UN police force. His intuition was unfailingly accurate; his detective skills second to none; and his psychic powers—esper sense and telekinesis—were awesome. Tough and deadly, Gil Hamilton could reach right into a person's brain for the truth . . . or for the kill! Read all the stories of the legendary ARM operative, collected here in one volume for the very first time: • Organleggers aren't stopping at robbing body parts from the corpses of the frozen dead. Now they're stealing from the living . . . and Gil is a prime target! • The most beautiful woman on Luna has been falsely accused of murder. Unless Gil can prove her innocence, she's doomed to end up as a sack of spare parts in the organ banks. . . . • And more . . . Plus an all-new, never-before-published Gil Hamilton adventure!

Futurist spaceflight meditations Giulio Prisco, 2021-06-03 We must strenuously push toward our cosmic destiny among the stars. Beginning to expand beyond the Earth before it's too late is our most important task at this moment in history. Many actors have important roles to play, and there's room for everyone. Spaceflight will also help find viable solutions for current developmental, environmental, and social problems. But the road to the stars is full of impediments and

roadblocks. We will not advance as fast as we wish. Therefore we must keep our mood strenuous and our drive strong. We need an optimistic spaceflight culture oriented to the future, with energizing visions of interplanetary, interstellar, and cosmic futures. We also need a futurist space philosophy.

The Dreaming Void Peter F. Hamilton, 2008-03-25 Reviewers exhaust superlatives when it comes to the science fiction of Peter F. Hamilton. His complex and engaging novels, which span thousands of years—and light-years—are as intellectually stimulating as they are emotionally fulfilling. Now, with *The Dreaming Void*, the first volume in a trilogy set in the same far-future as his acclaimed Commonwealth saga, Hamilton has created his most ambitious and gripping space epic yet. The year is 3589, fifteen hundred years after Commonwealth forces barely staved off human extinction in a war against the alien Prime. Now an even greater danger has surfaced: a threat to the existence of the universe itself. At the very heart of the galaxy is the Void, a self-contained microuniverse that cannot be breached, cannot be destroyed, and cannot be stopped as it steadily expands in all directions, consuming everything in its path: planets, stars, civilizations. The Void has existed for untold millions of years. Even the oldest and most technologically advanced of the galaxy's sentient races, the Raiel, do not know its origin, its makers, or its purpose. But then Inigo, an astrophysicist studying the Void, begins dreaming of human beings who live within it. Inigo's dreams reveal a world in which thoughts become actions and dreams become reality. Inside the Void, Inigo sees paradise. Thanks to the gaiafield, a neural entanglement wired into most humans, Inigo's dreams are shared by hundreds of millions—and a religion, the Living Dream, is born, with Inigo as its prophet. But then he vanishes. Suddenly there is a new wave of dreams. Dreams broadcast by an unknown Second Dreamer serve as the inspiration for a massive Pilgrimage into the Void. But there is a chance that by attempting to enter the Void, the pilgrims will trigger a catastrophic expansion, an accelerated devourment phase that will swallow up thousands of worlds. And thus begins a desperate race to find Inigo and the mysterious Second Dreamer. Some seek to prevent the Pilgrimage; others to speed its progress—while within the Void, a supreme entity has turned its gaze, for the first time, outward. . . . BONUS: This edition includes an excerpt from Peter F. Hamilton's *The Temporal Void*.

Flux Stephen Baxter, 2013-01-24 Star humans were engineered to exist within the mantle of a star, mere tools of their Earth-evolved makers in a war against the Xeelee, owners of the universe. Stephen Baxter's third novel in his magnificent Xeelee Sequence is an exotic and endearing story of an abandoned people. Abandoned to their fate, their history lost along with contact with their makers, Star people survive in an environment that is possibly the strangest in science fiction. Microscopic inhabitants of superfluid air above a Quantum Sea and below the tangled Crust of the Star, swimming in an electric-blue grid, the Magfield, which is subject to violent storms, Star people struggle, like us, to make sense of their world... and the threat hanging over it. Though the truth is far more disturbing and ominous than they feared, they will confront, finally, their makers, and they will rebel against the purpose for which they were created.
